## What is Accompanying Partner Employment Service?

Accompanying Partner Employment Service (Medflyttarservice) is a joint project between Private and public employers within the municipalities of Munkedal, Lysekil and Sotenäs on the Swedish west coast. The interests and needs of our partner employers form the basis of the service, the key issues of which include cooperation, competency, and exchange of recruitment knowledge and experience. The main task of the Accompanying Partner Employment is to help accompanying partners during the recruitment process.

### For example, we can help accompanying partners with:

- Personal support while looking for employment.
- Help with CVs and other job application documents.
- Partner employer contacts.
- Matching against vacancies within our networks.
- Someone to bounce ideas with during the relocation.

**If your partner has been offered employment with one of our partner employers, we can offer you accompanying.**

### How it works:

1. The partner employer reports the assignment to the Accompanying Partner Employment Service project group, which will assess whether the accompanying partner qualifies for support.
2. If the assignment is accepted, the accompanying partner will be contacted within a week to book a personal meeting.
3. We meet to explore wishes, needs and possibilities and to jointly agree on the next steps.
4. Partner employers are informed about the accompanying partner and the search for solutions begins.
5. If a matching vacancy is identified within our networks, the accompanying partner is provided with contact details.
6. Accompanying Partner Employment Service serves as a support and sounding board throughout the entire process.
